

# WHAT IS STORMWATER?

Stormwater runoff is the water that flows off roofs, driveways, parking lots, streets and other hard surfaces during rain storms. Instead of infiltrating into the ground, it flows into storm drains.

Stormwater runoff usually receives **NO TREATMENT** before entering waterways, and it might contain toxic substances such as solvents, oils, heavy metals, and washing fluids.

What falls in here,

ends up in here.

## HOW YOU CAN PREVENT STORMWATER POLLUTION

Vehicle fluids can be captured in containers and put into a waste fluid drum.

Containers stored outside must be sealed and cannot be exposed to rain water.

By using a portable wash pad, you can recycle the water used for washing before pumping it into a sanitary sewer.

## DO YOU OWN AN AUTO RELATED BUSINESS?

ARBs are any facility whose overall business is repairing, maintaining, painting, salvaging, or selling automobiles or parts.

In many communities, ARBs represent the **largest** generators of hazardous waste, and therefore are subjected to follow environmental ordinances.

### WAYS YOUR BUSINESS MIGHT POLLUTE STORMWATER

Allowing vehicle fluids to fall to the ground and wash away.

Improper storage of waste fluids.

Washing vehicles without a wastewater trap.

## HOW YOUR BUSINESS CAN BENEFIT

### Increase your clientele.

Customers appreciate a professional, clean, and environmentally friendly business.

### Save money

Avoid cleanup costs and fines by implementing pollution prevention practices in your business.

### Protect the environment

We all deserve to live in a community free from toxic substances with clean water.

# YOUR CITY ORDINANCE HERE

It is the responsibility of your business to ensure that only rainwater enters the storm drains in your city.
