

North Texas Zero Emissions Vehicles Call for Projects

Maximum Eligible Funding Levels for Vehicle Projects and Vehicle and Infrastructure Projects

Funding for each vehicle replacement project is limited by the federal cost share percentage or dollar funding cap, whichever is lower. The federal cost share percentage applies to vehicle projects only and the dollar funding cap applies to vehicle and infrastructure projects. Allowable funds should be exhausted on vehicle replacement activities prior to requesting any funding for infrastructure.

NCTCOG will award the maximum amount of funding allowed based on the vehicle and fuel type after application details are verified. NCTCOG will notify the applicant of any changes.

Funding Levels for Battery-Electric Vehicles

Vehicle Type	Federal Share of New Vehicle Price	Dollar Funding Cap (Vehicle + Infrastructure)
Straight/Box Truck	65%	\$190,000
Step Van	65%	\$160,000
Septic or Bucket Truck	65%	\$330,000
Other Vocational Vehicle	65%	\$355,000
Refuse Hauler	50%	\$260,000
Street Sweeper	50%	\$315,000
Transit Bus	33%	\$265,000
