

Understand your flood & wildfire risk & take action.

Buyers Aware is an analytical tool to assess the flood and wildfire risk to individual residential structures in Hurricane Harvey-impacted areas in Texas. Created for free public use by the Institute for a Disaster Resilient Texas at Texas A&M University with support from the Texas Division of Emergency Management.

A WELL-PREPARED TEXAS

Our vision is a Texas that is well-prepared for disasters and more resilient when they do occur, as a direct result of decision-making tools, data, and research that IDRT and our partners provide.

CALCULATING RISK AT THE PROPERTY LEVEL

Our property-specific analysis includes data from federal regulatory maps as well as advanced statistical models in an easily interpretable and transparent format.

REDUCING RISK

Floods and wildfires are damaging and costly events for residents. Buyers Aware offers several steps that you can take to reduce your risk; these steps are referred to as mitigation.
