Subject: Transportation Conformity Review and Concurrence

Dear Achille Alonzi:

Thank you for the opportunity to review the *2022 Transportation Conformity* report and supporting documents for the 2022 update to the Mobility 2045 Metropolitan Transportation Plan (MTP) and the 2023-2026 Transportation Improvement Program (TIP) developed by the North Central Texas Council of Governments (NCTCOG). The Texas Commission on Environmental Quality (TCEQ) is satisfied that all requirements are met and transportation conformity is demonstrated.

The purpose of this conformity analysis was to determine if the NCTCOG's updated 2045 MTP and its 2023-2026 TIP are consistent with transportation conformity emissions requirements for the Dallas-Fort Worth 2008 and 2015 eight-hour ozone standard nonattainment areas. The NCTCOG performed nitrogen oxides (NO_x) and volatile organic compounds (VOC) motor vehicle emissions budget (MVEB) tests using the 2017 MVEBs—130.77 NO_x tons per day (tpd) and 64.91 VOC tpd—adopted as part of the moderate classification *Dallas-Fort Worth Attainment Demonstration State Implementation Plan Revision for the 2008 Eight-Hour Ozone National Ambient Air Quality Standard* and found adequate for transportation conformity purposes by the United States Environmental Protection Agency effective November 23, 2016. The NCTCOG demonstrated that projected on-road mobile emissions in the 2023, 2026, 2036, and 2045 analysis years were lower than the NO_x and VOC MVEBs.

If you have questions about our review, please contact Jamie Zech of my staff at 512-239-3935 or jamie.zech@tceq.texas.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Huff".
