- Task 5 – Research Cumulative Impacts on Small Footprint Developments
 - o Will utilize XPSWMM models of Linwood area developed as part of City of Fort Worth’s cumulative Impacts Study in 2022
 - o Focusing on typical block or neighborhood, evaluate impervious scenarios and subsequent impacts on hydrology and hydraulics
 - o Deliverable will be a memorandum summarizing findings of the study
 - Task 6 – Engineering Best Practices for iSWM Submittals
 - o Summary and findings of Task 2
5. **FY25 Work Program.** NCTCOG will solicit discussion on FY25 Work Program deliverables. City of Denton, citing a 2011 E&D downstream assessments training, provided a recommendation to host a training that is less geared toward end point of construction, and perhaps more focused on H&H and downstream analysis. It was also recommended to focus on other portions of the iSWM Manual such as planning, water quality, H&H, and site controls.

City of Mesquite supported the item #10 which refers to guidance or training on temporary sediment basins.
