Climate

Goal: Reduce Absolute GHG Emissions by 20%

Scope 1

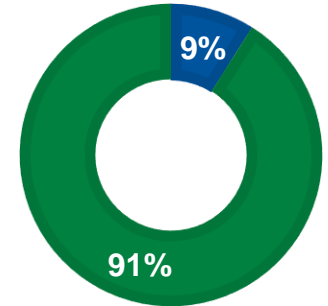

Fuel: Fleet, Thermal

Scope 2

Electricity

Scope 3

Upstream: Packaging, Agriculture

Downstream: Distribution, End of Life

Scopes 1 & 2

Scope 1: MFG Fuel
 Insulation, Burner Upgrades,
 WHR
 Biomass / Biogas Fuels
 Low Carbon Fuels

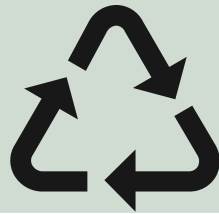

Scope 1: Fleet Fuel
 Engine Upgrades,
 Aerodynamics, Max Cube,
 Low Weight
 Electric Vehicles and Alt.
 Fuels
 Renewable Diesel / Nat Gas

Scope 2: Electricity
 Variable Speed Motors,
 LEDs, Compressor
 Optimization
 Solar Panels and Wind
 Turbines
 Wind Farms / Solar Farms

Scope 3

Agriculture
Sustainable
Farming
Program
Regenerative
Farming

Packaging
Recycled
Content
Biobased
Materials

3rd Party Mfg

PEPSICO IS EMBRACING RENEWABLE ELECTRICITY AROUND THE WORLD:

Transitioning to **100% renewable electricity** in U.S. direct operations in 2020.

Currently using **100% renewable electricity** in 9 European countries.

Sourced 65% of electricity needs from **wind energy** at PepsiCo Foods Mexico in 2019.

Progress and Next Steps

1.5 Pledge
Scope 1
Scope 2
Scope 3

In early 2020, we signed the UN's

Business Ambition for 1.5°C pledge,

underscoring our commitment to science-based target setting.

Over the life of our Frito-Lay electric vehicle fleet, we will have

driven 12 million all-electric miles

PepsiCo **reduced absolute GHG emissions by 6%**

across our value chain in 2019, progress toward our goal of 20% by 2030.
