

Regional Rail Information System

December Public Input Meeting
December 9, 2020

Collin Moffett, Transportation Planner
NCTCOG Transportation Department

A HISTORY OF COLLABORATION

Previous Coordination Efforts

Grade Crossing Separations/Grade Crossing Closings

Major Track Projects (Tower 55)

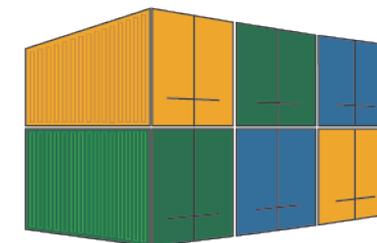

Project Coordination

Rail Studies

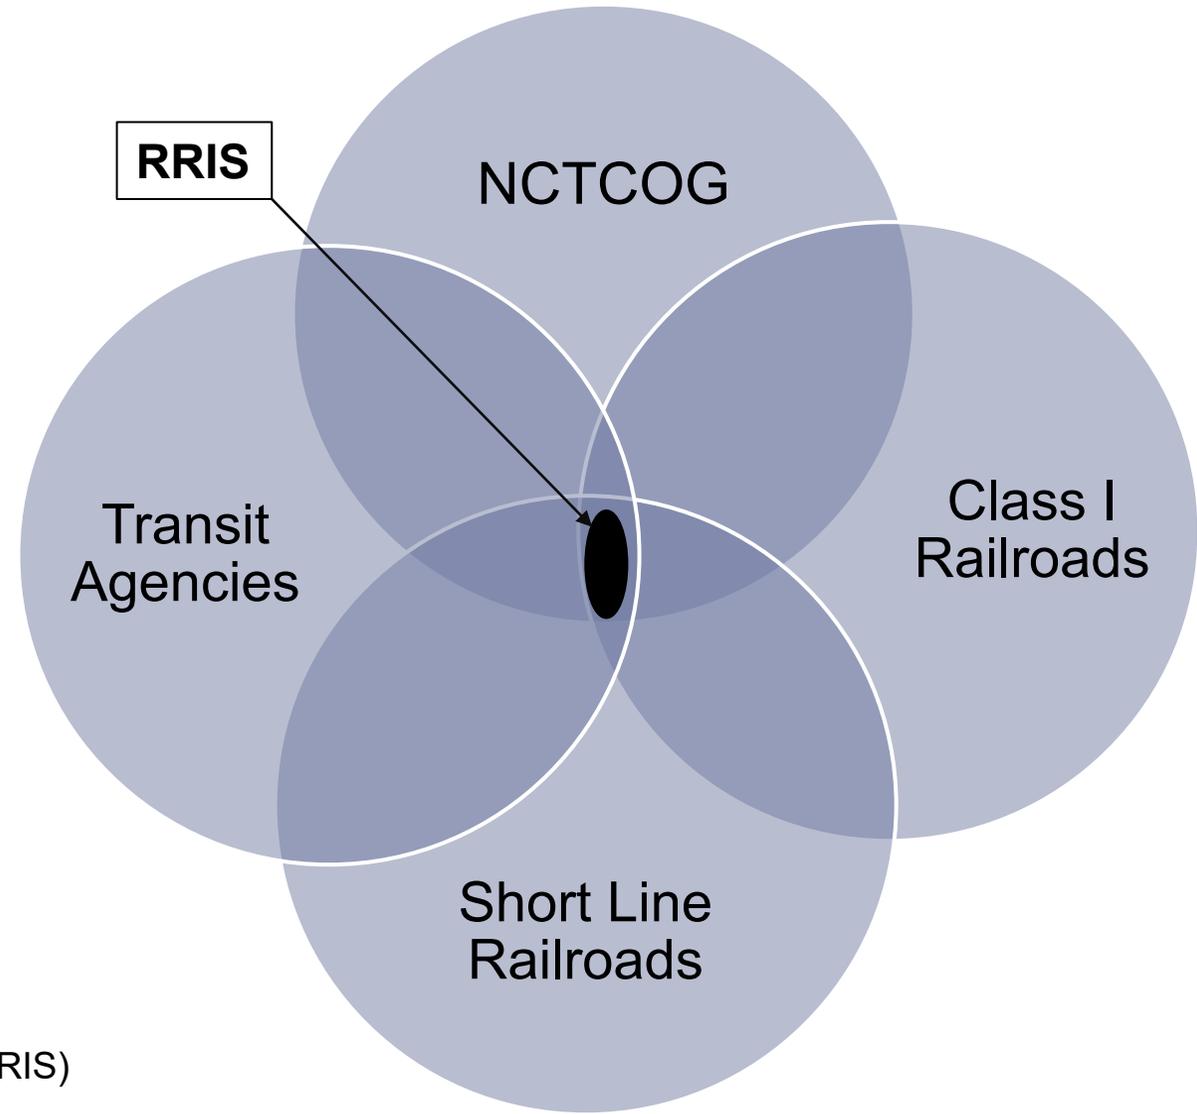

Technology Solutions (PTC)

Grant Submittals

FREIGHT
NORTH TEXAS

COORDINATION VISION

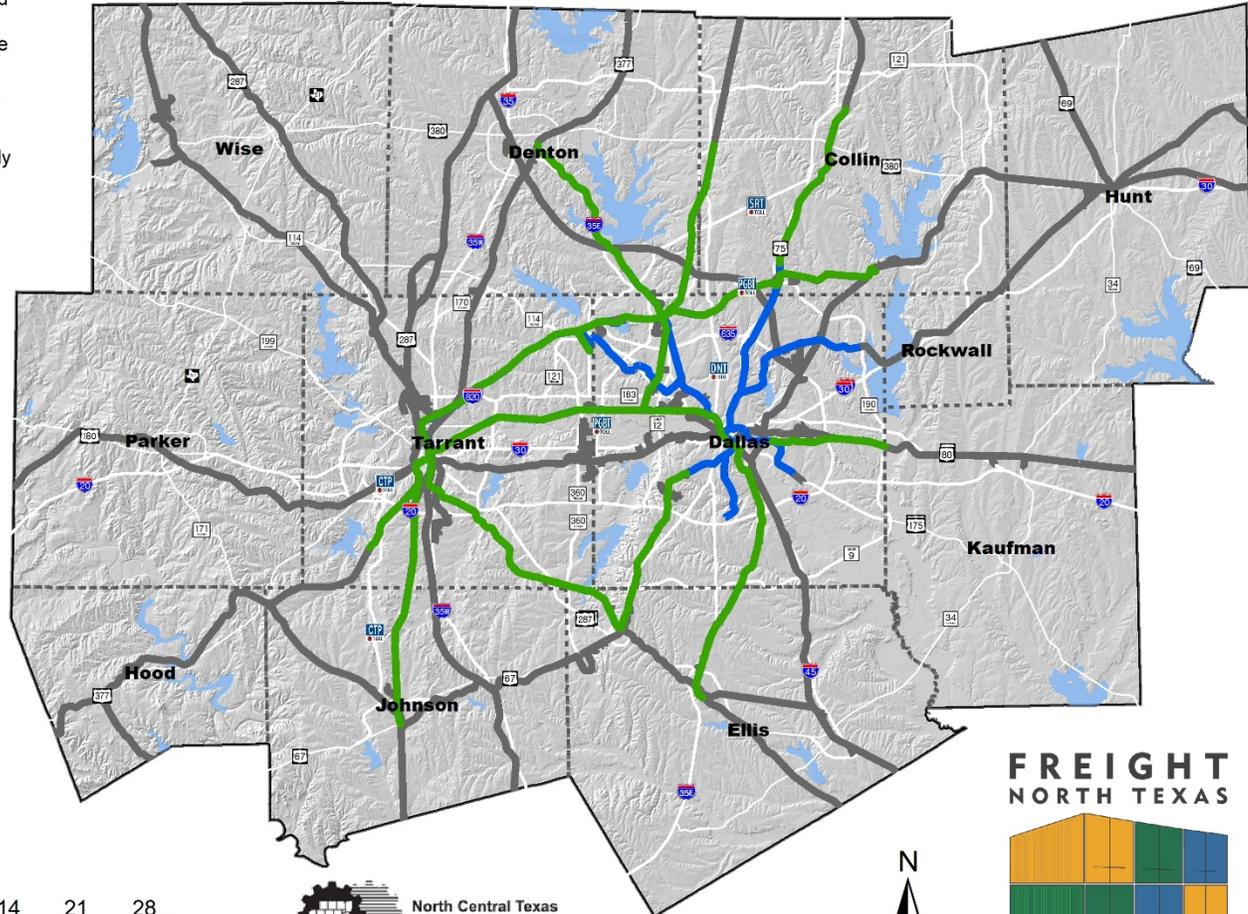

Regional Rail Information System (RRIS)

COORDINATION VISION

RRIS Corridor Impacts

Legend

- Current and Planned Shared Use Corridors
- Passenger Only
- Freight Only

0 3.5 7 14 21 28 Miles

SYSTEM STATUS

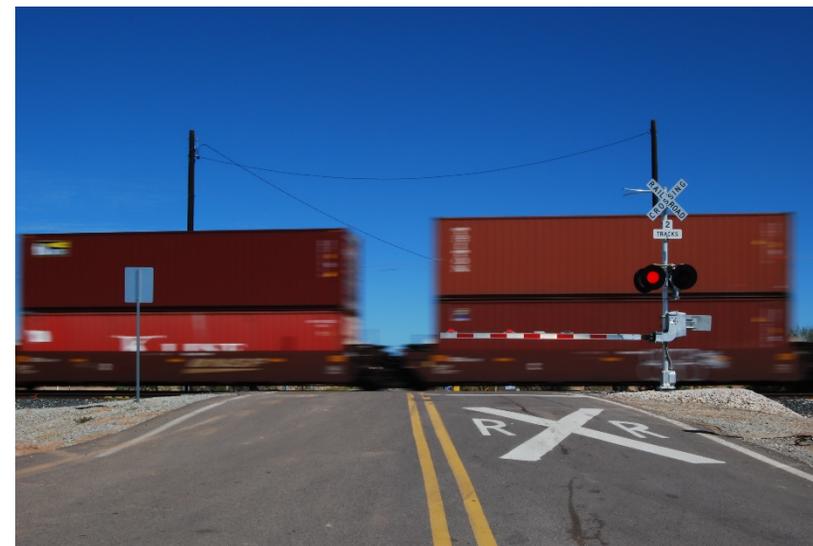

Current and Future Considerations

Freight and Passenger Interactions

Planned Freight and Passenger Growth

Dallas and Fort Worth Bottlenecks

Long-Term Mobility Plan Projects – Road and Rail

A FUTURE OF COORDINATION

Implementation of RRIS Technology will:

Assist with Freight and Passenger Train Interactions

Identify Rail Bottlenecks

Enhance Long-term Mobility Plan Projects – Road and Rail Interactions

Enable Rail Agencies to Exchange Timely, Accurate, and Actionable Information on Regional Train Movements

Identify Infrastructure Projects to Increase Rail Capacity throughout the Region
