

Green Asset Management Workshop

Tuesday, May 16th 9:00 AM to 3:00 PM

**Location – North Central TX Council of Governments, Pitstick Conference Room
Centerpoint II, 616 Six Flags Dr, Arlington, TX 76011**

- Green Infrastructure (GI) is an important tool for reducing flood risks and improving water quality.
- The Green Asset Management approach is a framework to inventory GI assets, proactively plan operation and maintenance, and achieve desired levels of service for a longer time at appropriate cost.
- You will hear speakers discuss their experience applying the Green Asset Management approach to the City of Denton's GI assets.

Target Audience - Municipalities, Water Districts, Engineers, Floodplain Managers

Certificate of attendance for educational credits will be provided

In-person attendance limited, register early at: <https://www.addevent.com/event/zS16739585>
