Television and Promotional Filming at Meacham International Airport and Perot Field Fort Worth Alliance Airport

Aaron Barth – Meacham, Assistant Aviation Director

Lauren Spence – Alliance, Director of Airport Operations

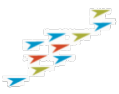

2/6/2025

Productions at Meacham

- Paramount+
 - Lioness S2 - July 2024
 - Landman S1 – March 2024
 - The Madison S1 – November 2024
- Red Productions
 - Promotional Video for Meacham’s 100 year anniversary – October 2024
- Future Filming
 - Landman S2 – March/April 2025
 - Lioness S3 – Summer 2025
 - The Madison S2 – Fall/Winter 2025

Filming Locations at Meacham

The use of this space was a revenue generator for the airport. We entered into a licensing agreement and charged for crew parking space. The rest of the filming typically occurred on private leaseholds

Filming Locations

Filming a scene inside the Gulfstream jet. Filming was completed inside a private hangar at Meacham Airport. Note the use of the blue screens around the jets windows. This was so they could go in after filming and add sky/cloud effects.

Landman S1 – Ramp Scene from the Show

Meacham Hangar 4C

An aerial photograph of the Modern Aviation FBO. The image shows several large hangars, a parking lot filled with cars, and a ramp area with several small aircraft parked. A text box is overlaid on the image, containing the text "Filming for Lioness S2 inside the hangar here and for episodes 5 and 6 on the ramp at Modern Aviation FBO". Two black arrows point from the text box to a large hangar in the upper right and to the ramp area in the lower left. The text "WELCOME TO FORT WORTH" is visible on a road in the lower left. A small logo is in the top left corner.

And a couple of air to
air scenes overflying
RWY 16/34.

- Vehicle driving scenes filmed on Meacham's perimeter road.

Lioness Season 2 Episode 3 used the perimeter road to film scenes for a “military base” and for some driving scenes for Landman filming inside the vehicle looking outside.

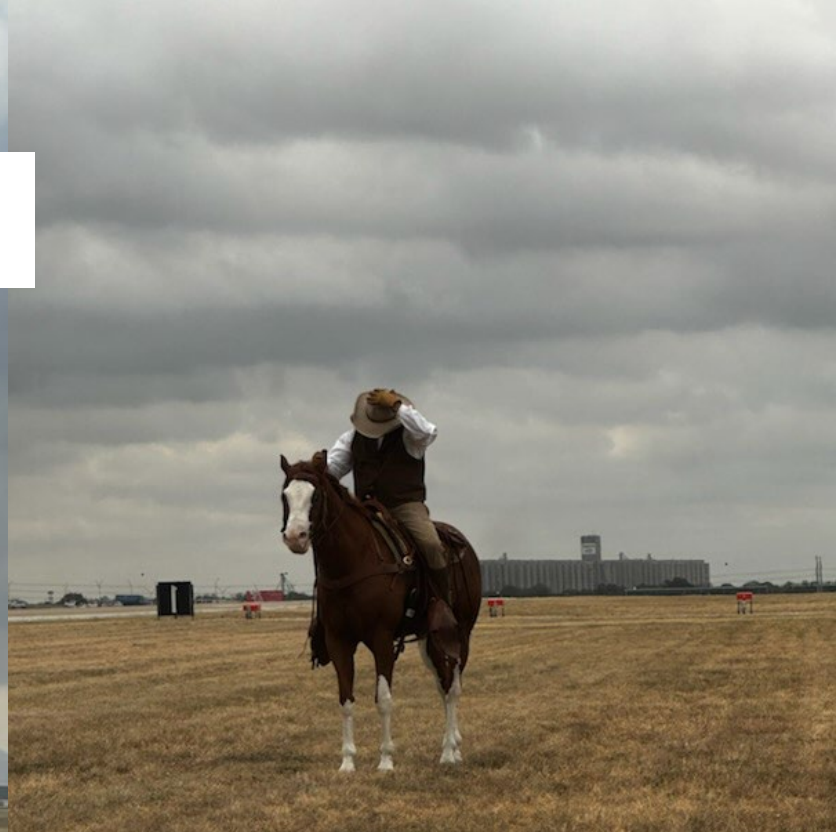

For all non-movement area filming, airport operations had personnel monitoring to ensure no impact to operations and to ensure personnel were contained to private leaseholds. There were limited scenes on the movement area, but the couple that were typically involved escorting of a camera car by airport operations so they could film a takeoff, landing, or low approach by an aircraft being flown specifically for the filming. Airport Operations would also help coordinate with ATC to ensure we did not impede regular operations.

Red Productions filmed along the perimeter road to capture a shot of a horse/cowboy with an airplane departing.

Fort Worth Meacham Int'l Airport

Photos taken during filming for Meacham's 100 year anniversary promotional video.

A futuristic white drone with a cockpit and four large propellers is flying over a dense city skyline at sunset. The sun is low on the horizon, casting a warm glow over the buildings. The drone is positioned in the upper right quadrant of the frame, with its shadow cast on the city below. The text "World Cup 2026" is centered in the middle of the image, and "AIRPORT SUBCOMMITTEE" is written in large, bold, orange letters below it.

World Cup 2026

AIRPORT SUBCOMMITTEE

BACKGROUND

A white quadcopter drone is shown in flight against a blue sky with light clouds. The drone is positioned in the upper right quadrant of the frame. Below the drone, a dense urban cityscape is visible, with numerous high-rise buildings and a network of roads. The overall scene is presented in a semi-transparent white overlay.

Our regions Airports must prepare for increased operations.
Key considerations include security, capacity, transportation, and emergency planning.

The World cup planning committee has numerous requests from those airports expecting an increase in operations.

Required Information

Maps and details of official ports of entry and transport facilities.

Locations of airports and ports of entry, including operational details.

Airport operations plan for arrivals/departures of teams, officials, and dignitaries.

Maps and logistical details for airport locations (size, reach, throughput, hours of operation).

Airport Survey

- 1** Do you have a Large Event or Special Event Operations Plan?
- 2** How do you handle increased air traffic demand (slot reservations, PPR)?
- 3** What security measures will be in place (TSA, law enforcement, FAA coordination)?
- 4** What contingency plans exist for weather delays and emergency situations?
- 5** Maximum operational capacity for aircraft parking and handling.
- 6** Coordination for ground transportation, rental cars, and shuttles.
- 7** Security protocols for team charters, dignitaries, and special guests.
- 8** Customs clearance procedures for international arrivals.

Next Steps

- 1** Complete Airport Safety, Readiness and Emergency planning survey
- 2** NCTCOG will continue to produce the web-based airport capacity notification system
- 3** NCTCOG will create draft Maps and details of official ports of entry and transport facilities. (where relevant)
- 4** Maps and logistical details for airport locations (size, reach, throughput, hours of operation).
- 5** Revise NCTCOGs Airport Drive time analyses
- 6** Next ATAC we will go over the survey results and Airport Drive time Analysis
