

## Certified Stormwater Inspector-Construction Dallas, TX on December 5, 2018

Construction stormwater permits have a requirement for the inspector to be qualified. This course applies to stormwater construction inspectors for both industry and government. The course focus is on inspector duties, responsibilities, and authority. It begins with the stormwater regulations and permits and is followed by a detailed discussion of how to perform an inspection. This course also covers construction best management practices (BMP) that work, and those that do not work. Participants receive the presentation, regulations, permit, SWPPP template and an erosion & sediment control manual all on a thumb drive.

- Clean Water Act
- Stormwater Permits
- Best Management Practices
- Low Impact Development
- Structural Controls
- Non Structural Controls
- Inspections
- Pollution Prevention
- Elimination of Non-Stormwater Discharges
- Reporting & Signatory Certifications
- Materials Storage & Waste Management
- Erosion & Sediment Control Measures

This one day course focuses on permit compliance as the key to avoiding stormwater fines and penalties.

Testing will be conducted; students are required to achieve a minimum overall score of 75% to be awarded .6 CEUs (Continuing Education Units) from the National Stormwater Center, and a five (5) year Stormwater Inspector Certificate.

### **Fred Heitman will be your instructor for this training.**

Fred conducted training for EPA and State NPDES managers under a three-year contract, which was managed by John Whitescarver. Fred was previously the Director of Water Enforcement for the State of Oklahoma and currently lives in Tennessee.
